LONDON GROVE TOWNSHIP

PUBLIC WORKS

2023 PAVEMENT CONDITION REPORT & 3 YEAR PLAN

INTRODUCTION

London Grove Township Public Works recognized the need to implement means and methods to evaluate the current road conditions, in order to make informed decisions on the maintenance, repair and replacement of the existing road network. Research was conducted to find a system which would provide the needed information in a fiscally responsible manner.

It was decided to utilize a system known as "Pavement Surface Evaluation and Rating" (PASER), which was produced by the University of Wisconsin-Madison, Transportation Information Center, in conjunction with the Federal Highway Administration and the National Local Technical Assistance Program (LTAP). The PASER system is based off of ASTM D6433 "Standard Practice for Roads and Parking Lots Pavement Condition Index Survey". The PASER system does not provide specific quantitative values for inspection, so it was decided to use the "Pavement Condition Rating System" (PCR) methodology, as published by the Ohio Department of Transportation (ODOT).

It should be noted that this report is not intended to be a project-specific design tool. Its intent is to help identify the location and extent of pavement problems and to plan overall solution strategies.

METHODOLOGY

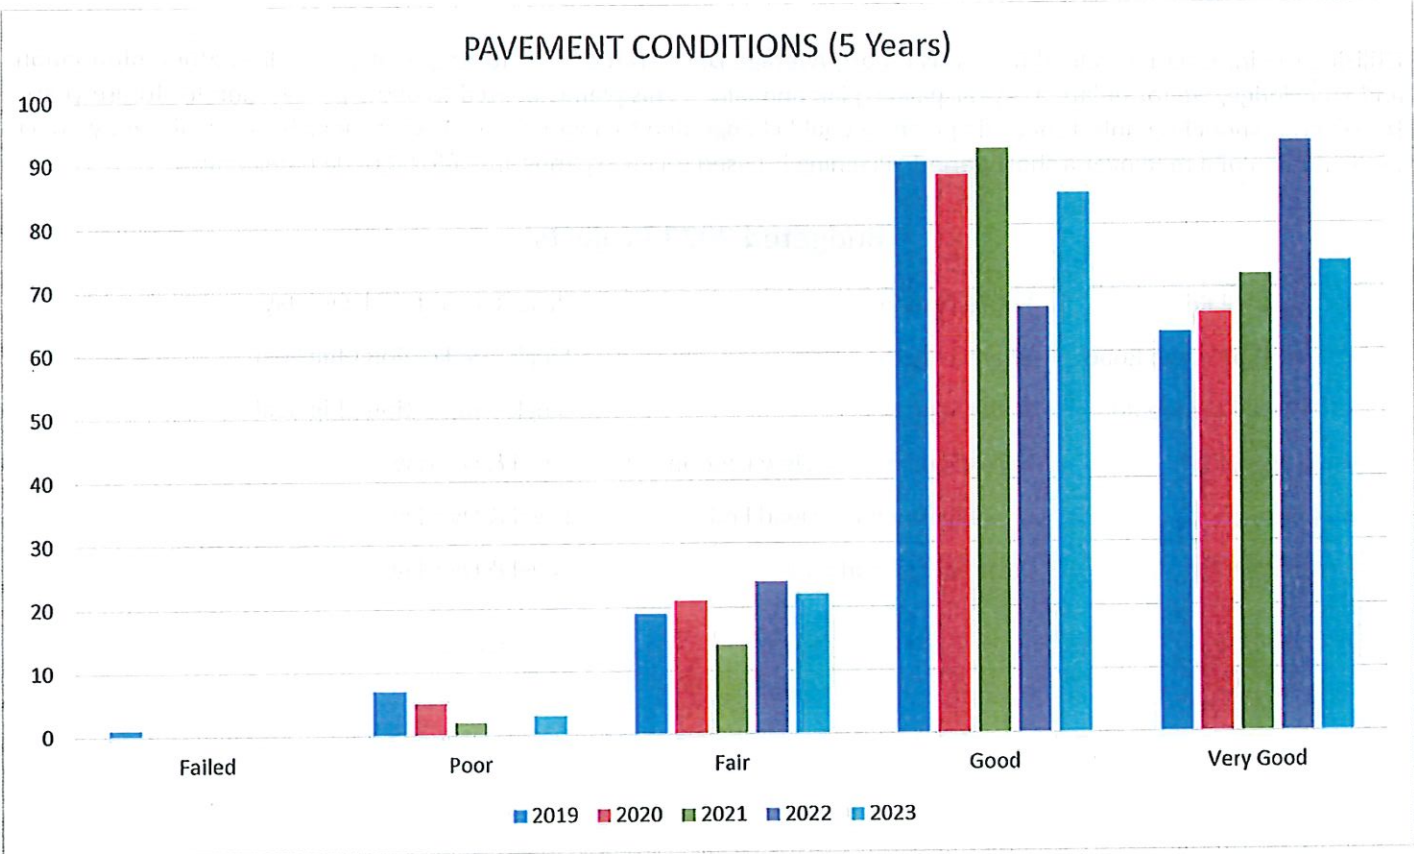

The roads were evaluated for the presence of multiple distresses, including reveling, bleeding, patching, potholes/debonding, crack sealing deficiency, rutting, settlements, corrugations, wheel track cracking, block and transverse cracking, longitudinal joint cracking, edge cracking, and random cracking. Based on this evaluation a "Pavement Condition Rating" (PCR) was assigned.

The Pavement Condition Rating indicates the overall condition of the segment. The higher the number, the better the condition. The PCR number generally indicates the condition as follows;

9-10	Very Good Condition	Little or no maintenance required
7-8	Good Condition	Routine maintenance, crack sealing and Minor patching recommended.
5-6	Fair Condition	Crack sealing, major patching, and Preventative treatments recommended.
3-4	Poor Condition	Structural improvements, leveling and Overlay, or recycling recommended.
1-2	Failed Roadway	Reconstruction recommended.

EVALUATION

The township’s 62.94 miles of road were evaluated in January and February of 2023, using a combination of “windshield evaluation” and surface investigation. A total of 184 segments were evaluated, with no new segments being added for this evaluation. Each segment may be a whole road, or a section of a road separated due to length or significant differences in road condition.

EVALUATION OUTCOME

The 2023 evaluation shows that ongoing maintenance efforts and near adequate budgeting continue to provide an overall acceptable Pavement Condition Rating and for the townships road network, resulting in good road surfaces for motorists.

You will however notice a downward trend in the overall condition ratings, this is a result of the aging of the large number of development roads constructed during the building boom of the late nineties and early two thousands. Consideration should be given in future budgets to increase the paving and surface treatment figures to address these aging roadways.

It is imperative that maintenance programs such as yearly crack sealing and selective patching continue in order to maintain the road surfaces. Additionally, budgeting to allow for resurfacing of the road network in a timely manner needs to be continued.

Considering a surface lifespan of 20 years, and 62.94 miles of roadway, we recommend a minimum of \$700,000 be budgeted, on a yearly basis, for contract resurfacing and reconstruction. This figure has increased due to increased costs due to the current economic situation in addition to decreased pavement lifespans due to the increased use of recycled materials and poorer oil quality in available asphalt mixes.

3 YEAR PAVING PLAN

Utilizing the information gained from this report, Average Daily Traffic (ADT) for segments, as well as other information and knowledge, we formulate a 3-year paving plan annually. This plan is utilized to allow preparation for future years. However, it should be noted that this planning could change due to a variety of variables, which can significantly affect the condition of a road over a short period. Planning is based on an expenditure of \$700,000.00 per year.

Budgeted 2023 Projects

• Rosehill Rd	Entire Length	Base Repair, Level, Overlay
• Lamborntown Road	Entire Length	Single Application Chip Seal
• Howell Moore Rd	Entire Length	Single Application Chip Seal
• Hipkins Rd ¹	W. Avondale Rd to New London Twp.	Level & Overlay
• Tice Rd ¹	N. Guernsey Rd to Dead End	Level & Overlay
• Dingee Rd ¹	State Rd to Dead End	Level & Overlay

1 - In house project.

Perspective 2024 Projects

- Wickerton Entire Subdivision Selective Base Repair, Level, Overlay
 - Stratford Drive, Nottingham Drive, Sheffield Drive, and Worthington Drive.
- Heather Grove Entire Subdivision Selective Base Repair, Level, Overlay
 - Welcome Ave, Chartwell Rd, Arber Ct, Deer Path Ct, Heather Grove Ln, Newfield Ct, Blossom Ct, and Sunrise Ct.
- Penwyck Entire Road Selective Base Repair, Level, Overlay

Perspective 2025 Projects

- Clay Creek Rd Entire Length Mill, level, overlay
- Walter Rd Entire Length Double App Chip Seal
- Hilton Rd Entire Length Double App Chip Seal

Perspective 2026 Projects

- E. Avondale Rd Schoolhouse to Wickerton Base Repair, level, overlay
- Kent Farm Entire Subdivision Mill, Level, Overlay
 - Kent Farm Lane, Eaton Way, Flintlock Circle, Marcus Way, Bandon Circle, and Airdale Circle
- Garden Station Rd Roosevelt to Ellicott Selective Base repair, Level & Overlay

Special Consideration Roads

- Hepburn Rd County Bridge to LG Village To be reconstructed under developer agreement for London Grove West project, timing unknown.
- Baker Station Rd Hepburn to dead end To be reconstructed under developer agreement for London Grove West project, timing unknown.
- Village of Chatham Church Alley, Pennock Lane Strode Rd PennDOT SR41 & SR841 project will effect roadways the full extent of such is unknown.
- Misty Hollow DR SR841 to dead end PennDOT SR1 & SR841 interchange project will effect Roadway, full extent is unknown
